Contents of Volume 55

NUMBER 1, APRIL 1976

| | |
|--|-----|
| Editorial Note | iii |
| T. P. COPPS, W. S. CHELACK, AND A. PETKAU. Variation in Distribution of Membrane Particles in <i>Acholeplasma laidlawii</i> B. with pH | 1 |
| ANNA RUTH BRUMMETT AND JAMES N. DUMONT. Oogenesis in <i>Xenopus laevis</i> (Daudin). III. Localization of Negative Charges on the Surface of Developing Oocytes | 4 |
| MAX BERGOIN, GÉRARD DEVAUCHELLE, AND CONSTANTIN VAGO. Les Inclusions Fusiformes Associées à l'Entomopoxvirus du Coléoptère <i>Melolontha melolontha</i> | 17 |
| HARRIETT E. SMITH AND ERNEST PAGE. Morphometry of Rat Heart Mitochondrial Subcompartments and Membranes: Application to Myocardial Cell Atrophy after Hypophysectomy | 31 |
| M. ORSENIGO, N. RASCIO, AND P. MEDEGHINI BONATTI. Fine Structure of the Etioplast in Two Mutants of Maize | 42 |
| B. BACCETTI AND R. DALLAI. The Spermatozoon of Arthropoda. XXVII. Uncommon Axoneme Patterns in Different Species of the Cecidomyiid Flies | 50 |
| S. S. THACH, M. L. COLLINS, AND R. E. THACH. Electron Microscopy of Single and Double Stranded Nucleic Acid: A New Technique | 70 |
| ROBERT M. LAVKER. Membrane Coating Granules: The Fate of the Discharged Lamellae | 79 |
| P. A. M. EAGLES, L. N. JOHNSON, AND C. VAN HORN. The Distribution of Anionic Sites on the Surface of the Chromaffin Granule Membrane | 87 |
| JEANINE R. CARITHERS. Ultrastructure of Rat Ovarian Interstitial Cells. III. Response to Leuteinizing Hormone | 96 |
| T. J. BEVERIDGE AND R. G. E. MURRAY. Reassembly <i>in Vitro</i> of the Superficial Cell Wall Components of <i>Spirillum putridiconchylium</i> | 105 |
| DON H. ANDERSON AND STEVEN K. FISHER. The Photoreceptors of Diurnal Squirrels: Outer Segment Structure, Disc Shedding, and Protein Renewal | 119 |

NUMBER 2, MAY 1976

| | |
|---|-----|
| Editorial Note | iii |
| JACQUES BEAULATON AND MICHELE MONPEYSSIN. Ultrastructure et cytochimie des hémocytes d' <i>Antheraea pernyi</i> Guér. (Lepidoptera, Attacidae) au cours du cinquième âge larvaire. I. Prohémocytes, plasmacytocytes et granulocytes | 143 |
| R. H. LOCKER AND N. G. LEET. Histology of Highly-Stretched Beef Muscle. II. Further Evidence on the Location and Nature of Gap Filaments | 157 |
| R. H. LOCKER, G. J. DAINES, AND N. G. LEET. Histology of Highly-Stretched Beef Muscle. III. Abnormal Contraction Patterns in Ox Muscle, Produced by Over-stretching during Prerigor Blending | 173 |
| SVEN-OLOF BOHMAN AND PETER K. A. JENSEN. Morphometric Studies on the Lipid Droplets of the Interstitial Cells of Renal Medulla in Different States of Diuresis .. | 182 |
| ANDREW F. ROWLEY AND NORMAN A. RATCLIFFE. An Ultrastructural Study of the <i>in Vitro</i> Phagocytosis of <i>Escherichia coli</i> by the Hemocytes of <i>Calliphora erythrocephala</i> | 193 |

| | |
|--|-----|
| LUIS F. GONZALEZ, WALTER S. KRAWCZYK, AND GEORGE F. WILGRAM. Ultrastructural Observations on the Enzymatic Activity of Keratinosomes | 203 |
| ROBERT J. TOMANEK. Ultrastructural Differentiation of Skeletal Muscle Fibers and Their Diversity | 212 |
| J. GRAIN AND J. SENAUD. <i>Oscillospira guillermondii</i> , Bactérie du Rumen: Etude Ultra-structurale du Trichome et de la Sporulation | 228 |
| GOTTFRIED BOGUSCH. Enzymatic Digestion and Urea Extraction on Leptomeric Structures and Normomeric Myofibrils in Heart Muscle Cells | 245 |
| JOHN G. BLUERMINK, PIM VAN MAURIK, AND KIRSTIE A. LAWSON. Intimate Cell Contacts at the Epithelial/Mesenchymal Interface in Embryonic Mouse Lung | 257 |
| FRITIOF S. SJÖSTRAND. The Problems of Preserving Molecular Structure of Cellular Components in Connection with Electron Microscopic Analysis | 271 |
| K. T. TOKUYASU. Membranes as Observed in Frozen Sections | 281 |
| Abstracts of Papers Presented at the Seventh Joint Meeting of the Northern and Southern California Societies for Electron Microscopy | 288 |

NUMBER 3, JUNE 1976

| | |
|--|-----|
| Editorial Note | iii |
| J. H. M. WILLISON AND M. R. DAVEY. Fraction 1 Protein Crystals in Chloroplasts of Isolated Tobacco Leaf Protoplasts: A Thin-Section and Freeze-Etch Morphological Study | 303 |
| D. F. G. ORWIN. Acid Phosphatase Distribution in the Wool Follicle. I. Cortex and Fiber Cuticle | 312 |
| D. F. G. ORWIN. Acid Phosphatase Distribution in the Wool Follicle. II. Henle's Layer and Outer Root Sheath | 325 |
| D. F. G. ORWIN. Acid Phosphatase Distribution in the Wool Follicle. III. Fate of Organelles in Keratinized Cells | 335 |
| MARTIN PORVAZNIK, ROSS G. JOHNSON, AND JUDSON D. SHERIDAN. Intercellular Junctions and Other Cell Surface Differentiations of H4-IIE Hepatoma Cells <i>in Vitro</i> | 343 |
| U. B. SLEYTR. Self-Assembly of the Hexagonally and Tetragonally Arranged Sub-units of Bacterial Surface Layers and Their Reattachment to Cell Walls | 360 |
| FRANCO COTELLI, MARCO FERRAGUTI, GIULIO LANZAVECCHIA, AND CARLA LORA LAMIA DONIN. The Spermatozoon of Peracardia. I. The Spermatozoon of Terrestrial Isopods | 378 |
| BERNARD MARCHAND AND XAVIER MATTEI. La spermatogenèse des Acanthocéphales. II. Variation du nombre de fibres centrales dans le flagelle spermatique d' <i>Acanthosentis tilapiaie</i> Baylis, 1947 (Eoacanthocephala Quadrigyridae) | 391 |
| B. VAN DEURS. Choroid Plexus Absorption of Horseradish Peroxidase from the Cerebral Ventricles | 400 |
| ROBERT L. KNOBLER, JEROME G. STEMPAK, AND MARY LAURENCIN. Nonuniformity of the Oligodendroglial Ensheathment of Axons during Myelination in the Developing Rat Central Nervous System. A Serial Section Electron Microscopical Study | 417 |
| M. CAMATINI, L. CERESA CASTELLANI, E. FRANCHI, G. LANZAVECCHIA, AND L. PAOLETTI. Thick Filaments and Paramyosin of Annelid Muscles | 433 |

| | |
|--|-----|
| KENNETH A. TAYLOR AND ROBERT M. GLAESER. Electron Microscopy of Frozen Hydrated Biological Specimens | 448 |
| D. G. HOWITT, R. M. GLAESER, AND G. THOMAS. The Energy Dependence of Electron Radiation Damage in <i>l</i> -Valine | 457 |
| Author Index for Volume 55 | 462 |

Notice

The subject index for Volume 55 will appear in the December 1976 issue as part of a cumulative index for the year 1976.

Conformation in Fibrous Proteins And Related Synthetic Polypeptides

By R. D. B. FRASER

T. P. MacRAE

Both in the Division of Protein Chemistry
Commonwealth Scientific and Industrial Research Organization
Melbourne, Australia

A Volume in the MOLECULAR BIOLOGY Series

Structure analysts have sought for more than 50 years to determine the molecular structure and conformation of fibrous proteins. This volume represents an up-to-date, comprehensive and integrated account of this complex problem. It examines available evidence on the structure and conformation of collagen, keratin, the muscle proteins and silk with particular reference to the native, solid state. A review of the physical methods employed is given and the use of synthetic polypeptides as protein models is also critically documented.

The book is divided into three sections. In the first, methods of determining conformation are described with particular emphasis on diffraction studies which provide much of the data upon which models of molecular structure have been based. The second section surveys the role of synthetic polypeptides as models of fibrous proteins and includes discussion of the alpha helix, beta, poly (glycine) II, poly (L-proline) II and related conformations. The last section tabulates data obtained from structural studies of silk, collagen, keratin, myofibrillar and other fibrous proteins, and discusses models for the structures of these materials at levels of organization ranging from the polypeptide chain conformation to the arrangement of molecules in the tissues.

CONTENTS (TENTATIVE):

METHODS OF DETERMINING CONFORMATION

X-Ray Diffraction; Glossary of Symbols. Electron Diffraction; Glossary of Symbols. Electron Microscopy; Glossary of Symbols. Optical Diffraction; Glossary of Symbols. Infrared Spectrophotometry; Glossary of Symbols. Analysis and Prediction of Conformation; Glossary of Symbols. Optimization Techniques; Glossary of Symbols. Other Methods of Studying Conformation; Glossary of Symbols.

SYNTHETIC POLYPEPTIDES AS MODELS OF FIBROUS PROTEINS

The Alpha Helix. The Beta Conformation. Poly (Glycine) II, Poly(L-Proline)II and Related Conformations. The Influence of Composition on Conformation.

CONFORMATION IN FIBROUS PROTEINS

Silks, Collagens. Myofibrillar Proteins of Muscle. Keratins. Conformation in Other Fibrous Proteins. Some General Observations on Conformation. References.

1973, 628 pp., \$45.00 / £21.60
